

Keeping Our Clinic Safe! What may look different...

In an effort to keep our patients, staff & community safe; we are implementing the following protocol for all in-person sessions.

We ask that everyone please:

Come to your appointment alone (unless in need of aid, or a parent)

Do not arrive more than 5 minutes early for your appointment to reduce the number of people in the clinic

Use **hand sanitizer** at the door upon arrival, and prior to leaving

Bring your own facemask to comply with government recommendations of wearing a mask when social distancing isn't possible

Avoid use of washrooms unless absolutely necessary

Utilize our **online booking of appointments** to reduce interaction with reception

Call clinic or send e-transfer for payment. If in-person payment is necessary, do this prior to your appointment

Our clinic/staff is doing the following:

Plexiglass shields installed at the reception desk

Ensure completion of **COVID 19 Screening Questionnaire** the day of your appointment

Spaced waiting room to comply with social distancing

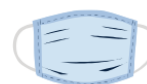

Increased time between appointment to **control traffic and Disinfect treatment areas**

Schedules may look different as **staff are working in shifts** to limit the number of people in the clinic at once

Email all documentation, including invoices and receipts

Staff will be wearing a facemask during the duration of their shift

Stay Safe! We Care About you!
